

## **Secondary Ready Catch-Up 2017-2018**

Grant Allocation £32,073

### **Secondary Ready Reading and Maths**

Thirty-nine pupils were placed in an intensive literacy and numeracy pathway with low student to teacher ratios based on the primary model. Fifteen of these students have already left this pathway as their progress in literacy and numeracy has improved and they met their end of year targets.

Forty-two pupils in mainstream had additional literacy intervention of which, forty-one met their end of year targets. Thirty-one students in mainstream had additional maths intervention and twenty-five met their end of year target. Remaining students continue with additional 1-2-1 tuition.

Forty-two students were behind in reading and were given an intensive reading intervention to raise their reading age to their biological age.

We will continue this model of catch up in the next academic year as the programme has improved the skills of these individuals to secondary ready.
